Location: York, United Kingdom

Professional Profile

I am a self-taught developer with two years' experience developing web-based applications for a range of clients. I understand the web application lifecycle and I am skilled at all aspects of development from project planning to requirement gathering through to writing and testing code, deployment and post-deployment support. I am currently seeking a full-time position which will allow me to demonstrate and further improve my skills in software development.

Core Skills

Programming Language: Proficient in HTML, CSS, MongoDB, MySQL, JavaScript and Typescript.

Attention to detail: Ability to identify and recognise individual aspects of a larger project and implement visually appealing and functional design elements.

Critical Thinking: Ability to translate business logic into clean, modular and testable code.

Problem solving: Skilled in debugging, critically analysing and solving issues.

Teamwork: Active listener and ability to articulate complex software information to both technical and non-technical groups.

Relevant Experience

Irrelon Software Limited   **June 2022 – Nov 2022**

Software Developer
- Part of agile team working on software programs for financial tracking and reporting.
- Implement complex user interfaces and functionalities according to designs and specifications.
- Debugging code and testing components.
- Peer code review.

Relevant Experience

Irrelon Software Limited   **June 2021 – May 2022**

Junior Software Developer – Apprenticeship

I was given a task to build online ordering and ePOS applications for small businesses with no initial specifications and from my own no design.

- Successfully completed full lifecycle of the applications on my own with minimal supervision and guidance.
- Successfully deployed the applications which now have six initial clients on a subscription service.

Education

Codecademy   **March 2020 – May 2021**

Completed Full-Stack Engineering course.

York College   **Sep 2018 – Sep 2019**

Access to Higher Education Diploma - Business

Passed with Distinction.

Additional Skills and Proficiencies

- Good understanding of HTTP protocol and how the web works.
- Good understanding of computer hardware.
- Good understanding of state management library such as Redux.
- Experienced in deploying applications on Linux server.
- Experienced in NGINX configuration as reverse-proxy.
- Experience with BDD testing using Jest and React Testing Library.
